

# LED Guide Lights

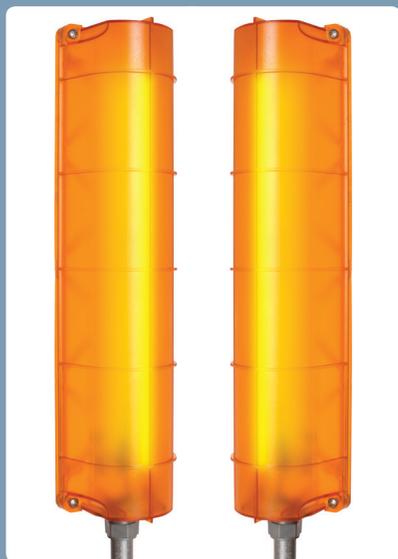

Figure 1: The LEDs used are 5x brighter than incandescent models

APS LED Guide Lights provide a visible reference point to help guide trailers into the loading dock. The LED lights illuminate the dock and help reduce the risk of overrunning the dock resulting in a bad hook or accident. APS LED Guide Lights are available in both 120 VA or 12-24 VAC/DC versions and are compatible with virtually any loading dock.

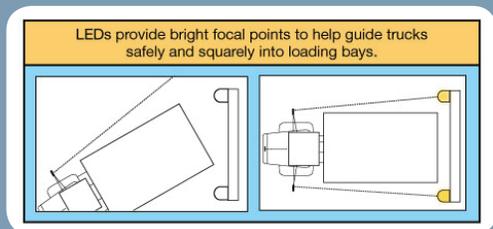

Figure 2: Top view diagram

## Design Highlights

- Energy-efficient
- Long-life LED's reduce maintenance costs and down time
- Activated with ON/OFF switch, relay, or permanent power supply
- Made in the USA
- Low-profile
- Rated for outdoors
- This product carries a (5) year limited warranty with APS Resource

## Technical Specifications

|                              |   |
|------------------------------|---|
| <b>Operation</b>             | Manual                                      |
| <b>Available Sizes</b>       | 15"H x 3-5/8"W x 2-3/4"D                    |
| <b>Input</b>                 | 120 VAC, 60 Hz, 70 mA                       |
|                              | 240 VAC/VDC 950 mA                          |
| <b>Construction Material</b> | Impact resistant polycarbonate construction |
| <b>Certifications</b>        | UL and cUL listed                           |
