

WeatherWall™

Figure 1: WeatherWall installation

WeatherWall is an enhanced brush-style weatherseal that includes a sheet of EPDM rubber. The central rubber layer increases the sealing properties of a dock door and/or leveler. With this product, your loading dock doubles down on energy savings and efficiency.

Design Highlights

- WeatherWall can be used anywhere a standard brush-style weatherseal would be used; doors, docks, conveyors, etc.
- Durable, synthetic EPDM air tight membrane
- Excellent choice for food, pharmaceutical and facilities in various climates
- These products carry a (1) year limited warranty with APS Resource

Technical Specifications

Purpose	Reduce energy loss felt around edges of dock & door
Available Sizes	Size is dependent on product location dimensions
Security	Deters insects and vermin from entering through edges of docks & doors
Construction Material	Heavy-duty propylene bristles
	Sheet of EPDM rubber placed between brush
